FRONTEND

HTML, CSS, JavaScript,
CSS pre-processors (LESS/SASS)
jQuery
React, Angular, Vue, React Native,
Progressive Web App (PWA)

SUMMARY

Solution Architect specializing in frontend experiences and CMS platforms across Sitecore XM Cloud, Adobe Experience Manager, and Magnolia. I help teams design and deliver scalable digital experiences, from architecture and advisory through implementation, with a focus on what ships for end users and what content teams can sustain after launch. Background in design, delivery, and marketing technology gives me a practical bridge between product, content, and engineering.

EXPERIENCE

SOLUTION ARCHITECT

Sitecore, Singapore

SEP 2022 - Present

- Advise customers and partners on Sitecore XM Cloud architecture, covering headless frontend approach, content modeling, and implementation patterns for enterprise sites.
- Guide solution design for headless Sitecore deliveries using Next.js, GraphQL, and modern frontend stacks, balancing developer experience, performance, and author usability.
- Support end-to-end delivery from architecture through troubleshooting, helping teams resolve integration, rendering, and platform issues across Sitecore XMC, CDP, and Personalize.
- Help content teams ship sustainable experiences by defining reusable components, templates, and authoring workflows that reduce dependency on developers after launch.
- Partner with stakeholders on technical discovery and proof of concept work, translating business requirements into scalable Sitecore solutions and clear implementation direction.
- Contribute hands-on across frontend and CMS boundaries, including component development, integration guidance, and best practices for XM Cloud and composable DXP implementations.

BACKEND

Java, NodeJS, Python

DATABASE TECHNOLOGIES

SQL (MySQL, PostgreSQL)

NoSQL (MongoDB)

CONTENT MANAGEMENT SYSTEMS

Sitecore XM Cloud, Adobe Experience Manager, Magnolia, Wordpress

DESIGN SOFTWARES

Figma, Adobe Photoshop, AdobeXD, Sketch

CLOUD COMPUTING PLATFORMS

Amazon Web Services

MICROSERVICES ARCHITECTURE

SOAP and RESTful APIs, GraphQL

MARTECH PLATFORMS

Adobe Martech Tools, Salesforce Commerce, SessionM, Mulesoft, Sitecore Connect, Sitecore CDP/P (ex Boxever)

SOFT SKILLS

- Proficient problem-solving and analytical abilities
- Demonstrated adaptability and eagerness to embrace new technologies
- Effective time management and organizational skills
- Proven collaboration and teamwork capabilities
- Exceptional communication skills, both verbal and written

SOLUTION ARCHITECT

Accenture, Singapore

DEC 2021 - AUG 2022

- Collaborated with clients to align solutions with business goals and technical capabilities.
- Evaluated options to identify effective approaches while considering risks.
- Led architecture discussions from RFP to define technical objectives.
- Developed user stories, conducted business analysis, and created architecture diagrams encompassing touchpoints like SessionM and Adobe Cloud Services.
- Utilized agile methodologies to capture requirements and promote cross-functional team understanding.

SOFTWARE ENGINEER

Accenture

JAN 2020 - NOV 2021

- Crafting web interfaces using React, Angular, VanillaJS, and PWA technologies, tailored precisely to client specifications.
- Seamlessly integrating headless web interfaces with AEM & Magnolia CMS platforms, ensuring smooth functionality and user experience.
- Orchestrating the integration of web interfaces with marketing technology tools such as Salesforce Commerce Tool, SessionM and Dynamic Yield, enhancing client's digital marketing capabilities.
- Leading and guiding a dedicated team of 5 frontend developers, employing agile methodologies to drive collaborative development and successful project outcomes.
- Developing SOAP/REST services using MuleSoft, facilitating seamless integration with Adobe Campaign, Adobe Target, and Adobe Analytics for enhanced campaign management and analytics capabilities.

UIUX ENGINEER

GovTech, Singapore

JUNE 2019 - NOV 2019

- Drove React design changes for a security platform in response to urgent redesign needs ahead of a minister's visit.
- Established a robust design system, delivering over 80 Figma screen designs within 3 months.
